PROJECTS

- **Personal Portfolio Website** | [Demo](#) | [Repository](#)
Technologies: React, JavaScript (ES6+), CSS/SCSS, Bootstrap, Google reCAPTCHA, GitHub Pages, Adobe XD
Designed and developed a responsive portfolio showcasing projects and skills, with interactive animations and secure contact form integration. Emphasized UX/UI principles for seamless navigation and visually appealing design.
- **Admin Panel Blog (MERN Stack)** | [Demo](#) | [Frontend](#) | [Backend](#)
Technologies used: React, Node.js, Express, MongoDB, JWT
Created an admin panel with secure JWT authentication, role-based access control, and dynamic content management.
- **MyFlix Movie Database (React & AWS)** | [Demo](#) | [Frontend](#) | [Backend](#)
Technologies used: React, Node.js, Express, MongoDB, AWS
Developed a movie database app with user authentication, browsing features, and profile management using CRUD operations.
- **Chat Application (React Native, Expo Go)** | [Repository](#)
Technologies used: React-Native, Expogo
Built a real-time chat app for iOS and Android, supporting messaging, image sharing, and camera functionality.
- **Meet App (Google Authentication)** | [Repository](#)
Technologies used: React, Google Firebase
Created a meeting app with Google Authentication, meeting charts, search by location, and city filters.
- **Pokemon API Catcher** | [Demo](#) | [Repository](#)
Technologies used: JavaScript, Bootstrap, JSON
Designed an API-based web application for searching and retrieving data, with Bootstrap-enhanced UI.
