YARA ZARIN
Full-Stack Web Developer

Skills:

- **Cloud Computing:**
  - AWS (Amazon Web Services)
  - EC2
  - S3
  - Lambda

- **Programming Languages & Frameworks:**
  - JavaScript
  - React
  - React Native
  - Express
  - Node.js
  - JWT
  - Angular

- **Databases: (no-SQL)**
  - MongoDB
  - Firebase

- **Version Control & Collaboration:**
  - Git
  - GitHub

- **Front-end Technologies:**
  - Bootstrap
  - CSS
  - SCSS
  - JQuery

- **Design Tools:**
  - Adobe Photoshop
  - Adobe InDesign
  - CANVA
  - Webflow

- **OS:**
  - Linux
  - Mac
  - IOS
  - Android

RELEVANT EDUCATION:

- **CareerFoundry, Berlin, Germany**
  Full-Stack Development(One Year Program)-Jan 2023

- **+3 years of private tutoring in front-end and back-end**

Summary

Proactive Full-Stack Web Developer specializing in MERN stack development and AWS cloud computing. Proficient in leading teams and project management, with a track record of delivering results. Skilled in transforming data into compelling narratives and captivating social media content. Thrives in remote work environments and excels in tackling challenges autonomously or collaboratively.

Projects

- **Admin Panel Website (MERN Stack): https://yarablog.netlify.app**
  - Developed an admin panel website using the MERN stack, featuring secure JWT authentication, role-based access control, and dynamic content management. Enabled efficient user, content, and system settings management, along with data visualization capabilities.
  - Technologies used: React, Node.js, Express, MongoDB, JWT.
- **MyFlix Movie Database (React & AWS): https://yaramyflix.netlify.app**
  - Developed a movie database application with features like user authentication, browsing movies, managing favourites, and profile editing. (CRUD Operations)
  - Tech: React, Node.js, Express, MongoDB, AWS
- **MyFlix Movie Database (Angular): https://shorturl.at/9Eluj**
  - Implemented a client-side movie application allowing users to sign up, log in, browse movies, manage favourites, edit profiles, and securely log out.
  - Technologies used: Angular, TypeScript, Bootstrap.
- **Chat Application (GitHub repo): https://github.com/yarazarin/CHAT**
  - Developed a real-time chat application for IOS and Android allowing guests to send and receive messages, share pictures, and use the camera feature on the Expo Go app.
  - Technologies used: React Native, Expo.
- **Meet App (Google Authentication): https://yarazarin.github.io/meet**
  - Built a meeting application with Google Authentication for login, displaying meeting charts, searching by city or country, and filtering cities by name and count.
  - Technologies used: React, Google Firebase.
- **Pokemon API Catcher: https://yarazarin.github.io/simple-js-app**
  - Designed a web application for searching and retrieving data from various APIs in JSON format. Utilized Bootstrap for UI design.
  - Technologies used: JavaScript, Bootstrap.

PROFESSIONAL EXPERIENCE:

- **Full-Stack Web Developer (M.E.R.N) AWS, CareerFoundry Oct 2023 – Feb 2024 (completed)**
  - Developed robust and scalable web applications using MongoDB, Express, React, NodeJS (MERN) stack and Angular.
  - Utilized AWS cloud computing for high availability and optimal performance.
  - Collaborated in cross-functional teams to deliver projects on time.

- **Social Media Communications Administrator, international NGOs 2010 – 2019**
  - Authored and researched articles on human rights, empowerment, and social change.
  - Translated English articles, fostering international connections.
  - Designed graphics and created video animations for social media education and training.
  - Fostered a spirit of social unity to continually advance civil and social rights, with progressive growth over time.

- **IT Manager – Warehouse Operations, National Oil CompanyNov 2010 – Jun 2012**
  - Spearheaded the transformation of storage facilities by implementing modern warehousing methods and technology-driven solutions.
  - Led comprehensive IT management for the warehouse, optimizing resource allocation and motivating the team to boost productivity and operational efficiency.
  - Designed advanced application tools to automate and streamline inventory management, including a proactive warehouse inventory warning system.
  - Directed the maintenance and repair of a fleet of over 150 computers, establishing a systematic filing system to enhance data accuracy and accessibility for inventory tracking.

- **Dispatching National Gas Company, Dispatching (IOC) Jul 2008 – Sep 2009**
  - Re-launched the ICO network of 5 provincial gas companies in the dispatching center, ensuring efficient communication and data transmission systems.
  - Assisted in setting up the decommissioned IOC system in five provinces, contributing to the restoration of critical infrastructure.
  - Managed repair and maintenance of solar power supply systems, ensuring uninterrupted operations.
  - Completed weekly training courses for radio systems, enhancing technical skills and knowledge.
  - Set up, repaired, and maintained UPS for emergency power supply, ensuring business continuity during power outages.
  - Built the internal LAN system of IOC corporate computers, improving network reliability and security.

VOLUNTEER EXPERIENCE:

- **Life Skills Coach Instructor, Community-Based Organizations**
  - Designed and delivered workshops on study techniques and memory enhancement.
  - Researched and compiled resources for educational programs.
  - Created audiobooks and digital books using Adobe InDesign.
